Kelly, Region 1 use is same as ours, we are covered. Doug Dixon gave me go ahead under those conditions. Go ahead and share the file.

Thanks Paul –

If it helps, Region 1's interest and use of the document is internal only – to the extent that it would be included in the record, we would include only the cover page.

Hi Danielle and Damien,

We have an agreement with EPRI that we (HQ) can request any of their publications for free, and we have a copy of many of their documents. We have used them as references, and they are part of our record. However, as the documents are copyrighted, we cannot share all of the documents freely. Our docket contains only the cover page. Caveat: if the EPRI document is old enough to be listed on their web page as shared, you should be able to download it for free.

If your request is for internal use only, we can share our copy with you. You can cite it in your record as we have, via the cover page. But you cannot place the entire document in the public domain. That would violate copyright laws.

So if this is something that would go to the state, the facility, or any other public entity, we can't do that. In that case, you would need to make a request directly to EPRI.

Regards,

Paul

Can we send this to them?

It's not yet a freebie on their website, but is in the docket. As I understand it, the docket won't publish protected materials online, but if someone comes to them in person or makes an individual request, they can often honor that. I'm not sure how that applies to pay materials, though.

I can ask—might help clarify.

Thanks

Kelly

Kelly –

I was hoping we could get a copy of the EPRI report referenced below. Please let me know.
Thanks.

Subject: TetraTech EPRI Reference

In its June 2014 Memo, TetraTech references an EPRI report that provides a Cost Estimate Tool for closed-cycle cooling retrofits:

EPRI. Closed-Cycle Cooling System Retrofit Study Capital and Performance Cost Estimates.

Technical Report No. 1022491. Final Report, January 2011.

Would it be possible to obtain a copy of this report?

Thanks,

Danielle
